

# Marine Electrical Apprenticeship

## Apprenticeship

As part of the Cornwall College Group, we are the largest provider of apprenticeships in the South West. We have a fully equipped specialist marine engineering workshop with a full size marine engine control room.

Whether you wish to repair and maintain marine engines or design a yacht, this marine engineering apprenticeship is the perfect place to start.

Our expert staff and specialist workshops will provide you with the best hands-on tuition so that you can gain relevant experience to help your career progression in the marine engineering industry.

This occupation is found in the engineering and manufacturing sector within the marine industry. Marine electricians may work for boat manufacturers, refit and repair boatyards, marinas and specialist marine electrical and marine electronic companies. The broad purpose of the occupation is to conduct a wide range of marine electrical, and marine electronic work operations that include the design and installation of marine assemblies and sub-assemblies. Upgrades, diagnostics, and maintenance to existing marine electrical and electronic systems and marine electrical and electronic repairs on boats, ensuring the safe and optimal use of a boat's electrical and electronic systems and services, that meet customers' requirements. They are responsible for installing, maintaining, monitoring, fault finding and repairing a wide range of marine electrical and electronic systems. They are responsible for undertaking the work from inception through to completion, including commissioning the electrical work, testing it and supporting sea trials
